More info...

The Dynabook. Source: A Personal Computer for Children of All Ages, Alan Kay, XEROX PARC 1968. November 5th, 2008 was the 40th anniversary since computer scientist Alan Kay devised the "Dynabook", a theoretical computing device which was aimed toward higher education and "children of all ages". Since the device's theoretical conception in 1968 and a publication of a paper proposing its use in ...

ReaddleDocs 1.1.1 adds online file service support (MacNN)

Readdle has released a v1.1.1 update to ReaddleDocs, its file management application for iPhones and iPod touches. The software enables users to copy files to Apple handhelds, view them while mobile, and engage in limited sharing with others; the app is particularly focused on the concept of e-books. The updated software lets users copy over documents from WebDAV-services, such as MobileMe ...
